To Whom it May Concern,

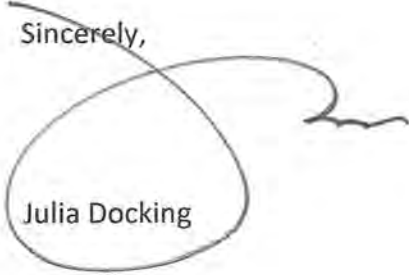

It is with great pleasure that I write this letter of recommendation for Elaine Cooperman. I have known Elaine for three years over which time she has tutored my children various levels of mathematics from Algebra 1 through AP Calculus.

Elaine is a gifted educator and passionate about her work. She is intricately familiar with curriculum material at all levels of instruction and is able to present information in a way that is easily accessible to her students. Not only an exceptional teacher, Elaine relates to her students and challenges them to ask questions and push to the next level. Elaine worked regularly with my son through his senior year in AP Calculus. He received an A in the class and has continued his study of mathematics in College. We attribute much of this success to his work with Elaine and her help through the process.

Over the years, I have shared Elaine's contact information with friends and colleagues looking for math support. Without exception, these families have been equally impressed by Elaine more than satisfied with their experiences. She is simply the best!

Without reservation, I highly recommend Elaine for math instruction and tutoring services. Please feel free to contact me directly (301.512.7453) if you would like to discuss further.

Sincerely,

Julia Docking
